PlyDesign: 73 Distinctive DIY Projects In Plywood (and Other Sheet Goods)

Synopsis

Make sleek and functional home furnishings from inexpensive plywood and other off-the-shelf materials using only basic hand and power tools. This unique building guide offers 73 innovative ideas for using plywood to make everything from desks and workstations to children's playhouses. Projects for every need and skill level are presented with clear assembly diagrams, step-by-step instructions, and photos of the finished product. Discover the simplistic beauty plywood can bring to your next project and take pride in making your own handmade furniture.

Customer Reviews

This is a collection of projects by different designers that use plywood sheets and other sheet goods for construction. For the DIY enthusiast who enjoys wood working, there are a lot of good reasons to get this book. The projects are a good mix of perfect beginner's projects and more advanced projects. For the woodworker who is comfortable and experienced, there are a lot of projects that can be put together reasonably quickly. If you're considering getting into woodworking and have access to power tools and someone who is willing to show you how to use them, this book has wonderful, contemporary designs for very functional furniture items made out of very affordable plywood. A lot of the designs only take one sheet of plywood. The instructions are clearly written with easy-to-understand plans for cutting. It starts with an introduction to plywood, the different types, and where the best places to buy it are. It also includes tips on hauling and storing the sheets which are

generally 4x8 feet and tips for making clean cuts. Then you get into the projects. My favorite kinds of projects are good knock down items. Things that can be disassembled easily and reassembled. There is a set of slot and tab end tables that use careful, clever cutting to make 2 out of one sheet of plywood to make a table that's over 3 feet across and stands about 30 inches high. The size, cost and ease of knockdown and putting them up make them perfect tables for all sorts of things. Stacked candleholders are an example of a project that can be made using hand tools. They are attractive and can be made in different sizes using scraps of plywood. It's a great project for children who are just learning to saw and use a brace.
