Reviewed by Suzy Morgan for Bonefolder Extras @

<http://bonefolderextras.blogspot.com/2014/08/playing-with-pop-ups-art-of-dimensional.html> I love pop-up books. I collect pop-up books: my family still gives them to me as birthday and holiday presents, even though I am a grown adult. I work in a library with a substantial collection of pop-up books, and I am quick to tell anyone who will listen that I have gotten to hold and play with an original Meggendorfer pop-up book. Therefore, I wasn't surprised when I was asked to review Helen Hiebert's new book, *Playing With Pop-Ups*. A passing observer would probably remark that I was "elated" at the prospect of doing such a review. Teaching the art of the pop-up is difficult, just like any how-to book about bookbinding, because it challenges the author to describe

3-D concepts in a 2-D format. Many pop-up structures function with a front-end and a back-end structure, just like a website: the viewer almost always only sees the front-end result, and the back-end support is not very apparent except to the experienced reader. I've looked at many a damaged pop-up book and wondered, "How on EARTH did they make this?" while trying to fit two parts of a broken whole back together unsuccessfully. Helen Hiebert's approach to this essential problem with teaching these complicated structures is a combination of providing templates to practice on, and a wealth of concisely illustrated instructions. The book begins with a very brief history of pop-ups, a commentary on the state of pop-up arts today, an interesting glimpse into the production of a commercially published pop-up book, and overview of the basic pop-up terminology, tools, and tricks of the trade.
