Customer Reviews

First off, this book is exactly what it says, a reprint of past articles. It includes information that ranges from beginner to expert machinist. Maintenance, repair, sporterizing, building from parts kits, it's all here. articles on materials, manufacturing processes (in a home shop setting) parkerizing, blueing, installing a barrel liner.What it DOESN'T have : full auto conversions (Why waste ink on a FELONY) and making a rifled barrel from scratch (Foxfire #5 and Bill Holmes' first book cover this)The articles appear to be the same general size as they appeared when originally published, The ONLY way that I would consider them to be inferior to the originals is that __some__ of them were originally published in color on slick paper and this book is entirely black & white non slick but decent paper.MOST but not all of the articles included : "restore that military rifle", "cutting and crowning a rifle barrel", "just park it yourself", "Can you blue it yourself? Yep!", "upgrading AK furniture",

"Gunsmithing Tools: Make your own!"(2 parts), "Machining for beginners" (4 parts), "Reclaiming a Rent-a-Cop revolver"(2 parts), "The basic black rifle", "An accurate AR for less than a Grand", "Budget building the model 1911", "Build your own AK? Yes You Can!", "Resurrecting a Citori" (5 parts) "Kathmandu to Columbia: Reviving a nepalese Martini"(2 parts), "Gunsmithing the Russian Nagant revolver" (2 parts), "the .22 caliber Lee-Enfield" (3 parts), "Building the Sten MK 2.
